

**Bydgoszcz University of Science and Technology is pleased to invite scientists to participate in:**

***II Seminar „Zero Waste Technologies”***

The seminar will be held on 31.05.2023 in a stationary manner in English. The aim of this event is to create a platform for the exchange of knowledge and experience of scientists from various fields who share the subject of waste-free technologies.

The seminar is interdisciplinary, however, during registration, please indicate one of the sessions for which the research topics are eligible:

1. Circular economy
2. Sustainable animal production technology
3. Modern methods of waste treatment
4. Waste as an energy resource
5. Management of waste biomass
6. Clean, low-waste and waste-free technologies
7. Sustainable design
8. Management of waste/by-products from industry
9. Smart solutions for waste-free technologies
10. Innovative energy solutions in waste-free technologies
11. Management of an innovative project in the area of waste-free technologies

As part of the conference, it is possible to present works both orally and in the form of a poster session. Participants who register for the seminar will be required to submit abstracts in English in advance, which will be published in the form of a book of abstracts. In addition, the participants of our seminar will have the opportunity to publish an article from the presented research in journals proposed by the organizers.

**Obligatory deadlines:**

1. Deadline for submitting applications and abstracts 05.05.2023

Sending the application form is tantamount to expressing willingness to participate in the Seminar and acceptance of the Seminar Regulations. It is possible to participate only actively in the conference.
